Team Triple Channel Xtreem DDR3

Team Xtreem Triple Channel Overclocking kit is designed specifically to satisfy the hunger for speed in the mind of overclockers and gamers. Taking advantage of the latest Intel's latest technology X58 chipset and Core i7 CPU, Team Xtreem Triple channel is engineered to unleash the raw power hidden inside the new MCP built-in inside the X58 chipsets.

Under the new guidelines of 1.65 VDIMM, Team Xtreem Triple Channel Kitis still able to perform up to 1866 CL 9-9-9-24 in just an instance.

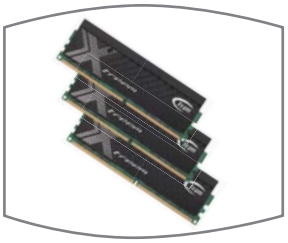
Team Group utilizes the most sophisticated IC sorting and heat dissipation technology to gain more overclocking margin from our products. The latest heat dissipation technology, force the heat from the chips to go through a specially designed heat tape. And then the excess heat is transferred into a thermal vaporizer heat spreader. This process can provide an even cooling environment for the modules performing at super high speed

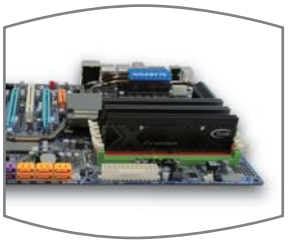
Main Feature

- ☐ Fully compatible with Intel X58-based DDR3 motherboards
- ☐ High frequency and Low latency
- ☐ Lifetime Warranty
- ☐ RoHS Compliant
- ☐ XMP Ready for Core™ i7 Processors
- ☐ Larger capacity: 6GB Kit (3x2GB), 2GB Kit (3x1GB)
- ☐ 100% Tested and Verified
- ☐ Equipped super thermal conduction heat spreader

Specification

Item	Specification
P/N	TXD36144M1866HC9TC、TXD33072M1866HC9TC
Suitable for	High End and Gaming PC
Module Type	240Pin Unbuffered DIMM Non ECC
DRAM Density	128x8
Capacity	6GB Kit (3x2GB)、3GB Kit (3x1GB)
Data transfer bandwidth	14,928MB/Sec (PC3 15000)
CL-value	9-9-9-24-2T
Working voltage	1.65V
PCB	8-layer PCB
Extra features	Super Thermal Heat Conduction Heat Spreader (optional 4-6cm fan can be set-up on heat spreader)
Warranty	Lifetime warranty





Ordering Information

Team P/N	Capacity	Description
TXD36144M1866HC9TC	6GB Kit(3*2GB)	PC3 15000 DDR3 1866MHz 9-9-9-24
TXD33072M1866HC9TC	3GB Kit(3*1GB)	PC3 15000 DDR3 1866MHz 9-9-9-24
